Gesipa® Taurus® 4

Air Riveting Tool for Rivets up to 6.4mm Ø

Gesipa® Taurus® 4 is a light-weight, high performance air hydraulic riveting tool. It features a patented jaw gripping mechanism. The jaws are pressed onto the mandrel by using compressed air instead of the traditional spring force - no more worn springs to replace. As a result, the tool is more reliable and has a longer service life. When the trigger is depressed, high pressure air clamps the jaws to the mandrels, the full stroke is utilised to set a rivet, and the clamping force is ten times higher than the spring method. The tool uses the same air to set the rivets and extract the mandrel. This tool provides considerable savings in compressed air usage.

Setting Capacity

* Bulb-Tite® rivets

Specifications

Product Code:	GT-TAURUS4
Weight:	2.0 kg
Length:	312 mm
Operating Air Pressure:	5 - 7 bar
Pulling Force:	20,000 N
Stroke:	19 mm

Package Accessories

Nosepieces: 17/36, 17/40 and 17/45
Maintenance wrench: SW12/14, SW 14/17
One hydraulic oil bottle 100ml
One oil refill container
Operating instructions with spare parts list
